Release TraceDrawer 1.9.2

February 9, 2021

New or Improved

- Model information now includes description of Affinity/EC_{50} evaluations (Help menu).

- New information about compatible text file formats (Help menu)

- Updated handbook

Fixes

- Plot tool now accepts curves without defined concentrations.

- Redundant concentration changes are removed prior to closing Properties.

Known Issues or Limitations

- Evaluations do not respond to changes made in Properties.

- Aborting a fit may result in an error message (can be ignored).

- Graph zoom can act strangely when the scale in Windows Display Settings is different from 100 %.

- A new and non-saved file gets an unconnected AutoRecovery file. You can change the extension from ".backup" to ".ltv" to access it.
